

Green Beast™ is a highly digestible protein source for deer during harsh winters. It's heavily utilized after the first hard frost when the leafy area of the plant becomes sweet in taste. After grazing the leafy area, deer will graze bulbs of the plant. Green Beast promotes deer herd health and is perfect for small hunting plots. Best late season food plot.

FoodPlotPower™ Tip: Mix with Frosty Feed™ to create a deadly food plot from the start to the end of your hunting season

Ingredients: Winfred Brassica, Hunter Brassica, Dwarf Essex Rape, Purple Top Turnips, Daikon Radish, Dominion Swede

Protein Content: Up to 34% protein

Plant Date: Late Summer to Early Fall (at least 60 days before first frost)

Seed Rate: Drill or Broadcast at 10lbs/acre

Seed Depth: 1/3" deep

Herbicide Type: Preplant: Glyphosate

Fertilizer Type/Rate: 13-13-13 at 350lbs/acre

Durability: Ability to withstand 10°F temperatures and retain green leaf

Package: 10lb and 50lb bags
